Wood River/Amoco Oil Company Refinery (Main Plant)
ILD980700967-HRS Scoring

EPA Region 5 Records Ctr.

291090

The Amoco Oil Company Refinery (Main Plant), located in Wood River, Illinois, is a closed refinery which ceased operations as of May, 1981. The site is presently under the operation of Amoco Petroleum Additives Company, a division of Amoco Corporation. The site was inspected by FIT personnel on March 4, 1986 in response to a Preliminary Assessment completed by the IEPA.

The results of the inspection revealed six (6) waste disposal areas within the site boundary which are not presently regulated. The remainder of the site is still under a RCRA Part A Interim Status Permit. Amoco has submitted a Closure Plan for this property to close it under Part A. However, the IEPA is still reviewing and modifying this plan and has yet to approve it.

Due to present U.S. EPA policy, this site will not be scored by the Hazard Ranking System (HRS) because of the previously mentioned RCRA implications.
